

NICApur[®] Supplements

Voller Leben

NICApur[®] Supplements Company

- An Austrian family business, private company
- Backed by a team of scientists
- Premium micronutrients exclusively available in pharmacies
- Purity as a matter of principle – “pure substance principle”
- Constantly increasing product range

That is what NICApur® stands for:

- Quality active substances with no hidden additives
- hypo-allergenic supplements
- Top quality products at a fair price
- Usage of only premium raw materials
- Target group oriented pack sizes
- ISO-22000 certified production
- Made in Austria

“Pure substance principle” – in depth look:

- Only active ingredients, NO unwanted substances like anticaking agents, filler, colours, flavours
- Appropriate for sensitive people
- Long-term application possible
- Hypo-allergenic

Secured by the semi-automatic production process of all NICApur[®] products!

Three product lines:

Basic: These preparations provide a targeted supply of highly active vital substances that are the basis of health, vitality and well-being.

NutriCoach®: The new product line from NICApur® provides customized products for the most demanded health topics. This special vital substance series is developed to enhance health and vitality from within – for palpable and clearly visible results.

mediBalance®: This range includes supplementary preparations for compensating the heightened need for nutrients associated with the intake of specific groups of drugs.

Example from basic range

- Trace element iron derived from a pure plant-based source (curry leaf) and vitamin C
- High level of bioavailability and good tolerability
- Important for blood formation, transport of oxygen and energy generation and functioning of immun system

Example from NutriCoach range

- Combines skin and nail relevant vital substances
- Helps regeneration process of nails and hair
- VitaminB6 for promoting the formation of cysteine
- Zinc, selenium, calcium out of fossil corals and silicic acid out of bamboo
- Copper contributing to normal hair pigmentation and mainting the color
